Creative brief

9th Sept
Company
Profile

ECE(India) Energies was established to provide fruitful services to the stakeholders through value addition with an eye for quality, a clean environment, and safe life. Though the region of Vidarbha, Maharashtra, India is lacking an industrial environment and employment and has managed to become an employment-creator starting from a handful of people in 2010.

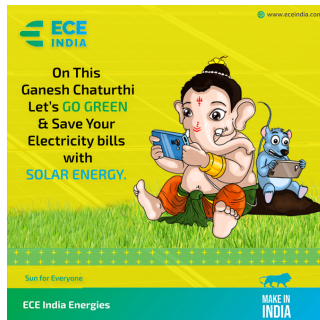

We at ECE Energies uses advanced Solar Panel Technology that is easier for customers to install and maintain as they do not require an electricity cable and benefit owners with reduced maintenance cost and electricity bills. Our solar panel technology can capture sunlight, convert it to electrical energy, and make it useful in our daily lives and in locations where there is no reliable electricity supply.

We are Central India's Solar PV Module Manufacturing Industry.

For any enquiries regarding the Solar Energy services, call us on +91-7774092701

10th Sept
Ganesh Chaturthi

Lord Ganesha is the remover of obstacles in life and brings you eternal pleasure and peace. Similarly, ECE(India) Energies' innovative Solar Power Technology has the potential to solve your problems and make the environment clean and green for everyone.

When you choose to invest in a solar panel system from ECE(India) Energies, you will undoubtedly benefit in the following ways:

- Solar panels use energy from the sun, not expensive fossil fuel, meaning no expensive electricity for you.
- Excess electricity will help you save further by returning it back to the grid for a meter reversal or storing it in a home battery.
- Using solar panels can reduce your electricity bill by as much as eight times

13th Sept
Company Profile

Solar energy holds the key to a sustainable energy future. Every day, the sun produces significantly more energy than we require powering the entire planet. ECE (India) Energies recognizes future demand and provides solar panels that are reliable, cost-effective, and long-lasting, and when combined with a solar battery storage system, and make a major difference to the environment, transforming solar energy into a much more efficient source of clean energy.

15th Sept
Engineers Day

Engineers at ECE(India) Energies devote their effort and time to overseeing both the technologies and processes involved in producing high-quality solar components and use mathematical models to optimize production methods and elimination of waste. Their innovative ideas have resulted in a solar panel system that is both efficient and cost-effective to manufacture.

ECE(India) Energies wishes you Happy Engineers Day!!

17th Sept
Machinery &
Process

ECE(India) Energies is a leading solar panel manufacturer in India. Our 180W-450W Power Output range is in high demand and exceptionally reliable due to its stringent quality control and it benefits consumers in the following ways:

- Designed with new generation PERC Technology
- Higher cell Efficiency than conventional Polycrystalline cells
- More Power Output per Sq. meter
- Outstanding Low Light and Longer wavelength performance
- Lower temperature coefficient
- Only positive power output tolerance
- Designed for 1500V System

20th Sept
Application &
Specialization

We at ECE(India) Energies provide solar street light, solar blinkers system that are suitable for traffic signalling or highway blinker application without having to rely on the electric grid. These are robust, long-lasting, patented, proven technology solution comes with very high efficiency crystalline solar panels, assuring longevity and reliable performance over many years. We have use batteries which are heavy-duty solar-grade batteries giving reliable backup to the solar street lights.

Customer related
Post

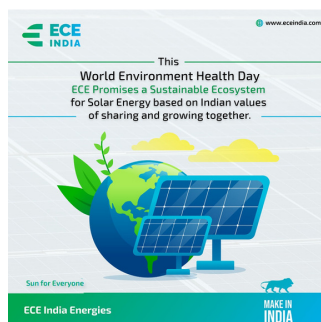

We at ECE(India) Energies have built a reputation for offering 10 MW+ satisfied customers and successful consultancy services in EPC projects to famous big names to name a few, M/S Adani, Reliance, IRB, etc, in the solar panel business with over 11 years of expertise. Our consumers consistently rate us 5-stars, and always received positive feedback. Customers choose us because they know we have a reliable infrastructure. We are always upgrading our solar panels to the most up-to-date technology to keep our customers happy at all times.

26th Sept
World Health
Environment
Day

ECE (India) Energies use cutting-edge solar panel technology that produces no greenhouse gases, making it safe and environmentally friendly while also contributing to a sustainable future. We have started community-based solar initiatives that can help low income people save money on their heating costs, reduce their reliance on public utilities, and enhance the environment by reducing pollution.
ECE (India) Energies wishes you Happy World Environment Day!

27th Sept
World Tourism
Day

Solar power has surpassed fossil fuels and become the most important source of energy for electricity production in many parts of the world. This year more than 115 gigawatts (GW) of solar are installed across the world, which is more than all other generation technologies put together. The total energy used by the planet is more than 10,000 times the amount of sunshine that strikes the Earth. With our sophisticated solar panel technology, ECE (India) Energies promises to boost efficiency and minimize costs while harvesting as much solar energy as possible.

29th Sept
Product

ECE(India) Energies manufacturing facility is equipped with polycrystalline, monocrystalline, DCR bifacial PV modules. We manufacture modules starting from 20Wp to 525Wp. We use high efficiency solar cell procured from the best manufacturers and used only after thorough in house testing. Our product are highly reliable in terms of power output, temperature and geographical variations.

Achievement

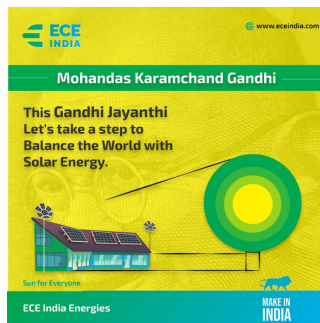

ECE (India) Energies is the trusted manufacturer for Solar Energy projects. We have over decades of experience developing and implementing turnkey solar power projects with experience and skills to help you reach your goals straight away, as impressively proven by over 2000+ successful projects in over 100 locations across India. We are a firm believer that Success must be built on a solid foundation and are always one step ahead in meeting the increasing solar power demands.

Company
Infrastructure

ECE(India)Energies premise is spread over 22000 square feet and houses all the necessary equipment, tools and HR facilities so as to deliver best quality in manufacture with integration into following units.
In-house Design & Fabrication
Warehouse & Packaging unit Fabrication
Quality Control Department
R & D Department
Every integrated unit is equipped with technologically advanced machineries and equipment's as required for the manufacturing and processing by specific department which has increased our production capacity to about 300 pieces per day.

Company Profile

Consistent quality improvement is our foremost priority. Every ECE employee is committed to customer delight. The management of ECE (INDIA) ENERGIES PRIVATE LIMITED releases following collective quality policy of the company. Every member pledges her/his allegiance to the policy.

- Customer Satisfaction
- Customer always right
- Working in Team Spirit
- Unequivocal customer bond
- Conservation of depleting resources
- Continual quality and performance improvement
- Altruistic interaction at formal and informal levels
- Strict adherence to quality management system

7th Oct
Services

We at ECE(India) Energies provide a wide range of Solar Energy Services and excellent , customized end-to-end solutions. The services offered are:
Operation & Maintenance
1. PV Solar Plants Rooftop System (On Grid & Off Grid)
2. Solar Ground Mount System
Training & Development
1. Solar Installation
2. Electrical Safety & Audit
3. Solar Project Development
Project Management and Consultancy
1. Rooftop Systems (On-Grid and Off-Grid),
2. Survey and Map Designing
3. Load Optimization
4. Solar Power Plants
5. Solar PV Plant Rooftop Off & On Grid System
6. DPR Preparation for Green System

Products

India is fortunate in that sunshine is abundant, but one of the big challenges is obtaining solar Photo Voltaic (PV) cells, which is one of the major constraints. We at ECE (India) Energies recognize the potential and have been able to create Solar Panel and Road Safety based products, which have since evolved into a multi-faceted green and solar energy organization. Solar Blinkers, Solar Water Pumps, Solar Fencing, Solar Street Lights, Graphical Countdown Timer, and other road safety devices are among the unique products on offer.

9th Oct
Application &
Specialization

Ground-mounted solar panels are an easy-to-install solar solution for a wide yard or field. The panels are installed on the ground. ECE(India) Energies is a prominent provider of ground-mounted solar systems with a long history of green technology experience. We create and install customized solar energy systems for residential, commercial, and agricultural applications, and any other location with available land.
Benefits of Ground Mount Solar System
-It can be ideally placed wherever they need to be.
-Better Efficiency
-Ease of Maintenance
-Panel Longevity
-Future Expansion
